SUMMARY

Computer Science undergraduate with hands-on experience in front-end web development, presentation design, and full-stack project delivery. Skilled in Python, JavaScript, React, and data-driven visual communication, with a proven ability to translate technical requirements into clean, well-structured deliverables.

EDUCATION

Galgotias University <i>B.Tech in Computer Science & Engineering</i>	Greater Noida, India 2022 – 2026
St. Xavier's High School (CBSE) <i>Class XII</i>	2021
Alok Vidyashram (CBSE) <i>Class X</i>	2019

EXPERIENCE

Junior Presentation Designer Trainee <i>EZ Lab Private Limited</i>	Jan 2026 Gurgaon, India
- Created and edited structured, professional PowerPoint presentations for client delivery. - Designed templates with consistent formatting, alignment standards, and visual hierarchy. - Improved slide clarity through precise layout adjustments and formatting fixes. - Worked with charts, graphs, and Excel-integrated data visualizations. - Applied best practices in slide structuring and visual consistency across decks.	
Web Full Stack Developer Intern <i>Edskills Academy</i>	Oct 2024 – Dec 2024 Remote
- Developed responsive UI components and integrated backend functionality for web applications. - Worked with Apache Tomcat for server deployment and debugging. - Participated in code reviews to maintain code quality and project standards.	
Cyber Security Intern (Virtual) <i>Palo Alto Networks</i>	May 2023 – Jul 2023 Remote
- Performed vulnerability assessments and conducted basic penetration testing exercises. - Gained hands-on exposure to network security concepts and threat detection methodologies.	

PROJECTS

E-Commerce Website (YASA TRADERS) HTML, CSS, JavaScript
- Built a full-stack e-commerce platform with user authentication and session management. - Implemented shopping cart, payment flow, and order management system. - Designed fully responsive UI compatible across multiple devices and screen sizes.
Speech-to-Text Model Python, VSOC Technology
- Developed a speech recognition system using Python with an optimized audio processing pipeline. - Achieved approximately 95% transcription accuracy through model tuning and preprocessing improvements.

TECHNICAL SKILLS

Languages: Python, Java, C++, HTML, CSS, JavaScript
Technologies: React, Networking, Database Design, Apache Tomcat
Tools: Git, VS Code, Android Studio, MS Word, MS Excel, MS PowerPoint
Other: Presentation Structuring, Data Handling, Formatting & Layout Precision

CERTIFICATIONS

Packet Tracer – Cisco Networking Academy	Apr – May 2024
Database Design – Oracle Academy	Dec 2023 – Jan 2024
Cybersecurity Fundamentals – IBM	Dec 2023
